

# A- level Physics Transition Pack & summer work

# Nobel

## To do over summer

- 1) Get organised – you will need a scientific calculator, A4 lever arch folder, A4 ring binder, dividers, plastic wallets
- 2) Bookmark key resources now  
OCR A physics (specification & past papers),  
<http://www.ocr.org.uk/qualifications/as-a-level-gce/as-a-level-gce-physics-a-h156-h556-from-2015/>  
Physics & maths tutor (bank of topic notes and questions)  
<http://www.physicsandmathstutor.com/physics-revision/a-level-ocr-a/>  
Exam smasher (bank of timed MCQ questions) <https://examsmasher.com/>
- 3) Read and complete all tasks in this booklet
- 4) Get Registered for free problem solving practice (you have a summer task to complete on there too just join the group with the link below)

Join class group

- <https://isaacphysics.org/account?authToken=A2F3TB>

Then Start with this button or go to [https://isaacphysics.org/solving\\_problems](https://isaacphysics.org/solving_problems)

## Pre-Knowledge Topics (read, learn & do activity)

Below are ten topics that are essential foundations for your study of A-Level Physics. Each topic has example questions and links where you can find out more information as you prepare for next year.

### Symbols and Prefixes

Prefix	Symbol	Power of ten
nano	n	$\times 10^{-9}$
micro	$\mu$	$\times 10^{-6}$
milli	m	$\times 10^{-3}$
centi	c	$\times 10^{-2}$
kilo	k	$\times 10^3$
Mega	M	$\times 10^6$
Giga	G	$\times 10^9$

At A level you still need to remember all symbols, units and prefixes. Below is a list of quantities you may have already come across and will be using during your A level course

Quantity	Symbol	Unit
Velocity	v	$\text{ms}^{-1}$
Acceleration	a	$\text{ms}^{-2}$
Time	t	seconds s
Force	F	Newtons N
Resistance	R	Ohms $\Omega$
P.D./Emf/Voltage	V	Volts V
Current	I	Amps A
Energy/Work done	E or W	Joules J
Pressure	P	Pa or $\text{Nm}^{-2}$
Momentum	p	$\text{kgms}^{-1}$
Power	P	Watts W or $\text{Js}^{-1}$
Density	$\rho$ ('rho')	$\text{kgm}^{-3}$
Charge	Q	Coulombs C
Mass	m	Kilograms kg
Weight	W or mg	Newtons N

### Solve the following:

1. How many metres in 2.4 km?
2. How many joules in 8.1 MJ?
3. Convert 326 GW into W.
4. Convert 54 600 mm into m.
5. How many grams in 240 kg?
6. Convert 0.18 nm into m.
7. Convert 632 nm into m. Express in standard form.
8. Convert 1002 mV into V. Express in standard form.
9. How many eV in 0.511 MeV? Express in standard form.
10. How many m in 11 km? Express in standard form.

### Standard Form

At A level quantity will be written in standard form, and it is expected that your answers will be too. This means answers should be written as  $\dots \times 10^y$ . E.g. for an answer of 1200kg we would write  $1.2 \times 10^3$ kg. For more information visit:

[www.bbc.co.uk/education/guides/zc2hsbk/revision](http://www.bbc.co.uk/education/guides/zc2hsbk/revision)

### Solve the following:

1. Write 2530 in standard form.
2. Write 280 in standard form.
3. Write 0.77 in standard form.
4. Write 0.0091 in standard form.
5. Write 1 872 000 in standard form.
6. Write 12.2 in standard form.
7. Write  $2.4 \times 10^{-2}$  as a normal number.
8. Write  $3.505 \times 10^{-1}$  as a normal number.
9. Write  $8.31 \times 10^6$  as a normal number.
10. Write  $6.002 \times 10^2$  as a normal number.
11. Write  $1.5 \times 10^{-4}$  as a normal number.
12. Write  $4.3 \times 10^3$  as a normal number.

## Forces and Motion

At GCSE you studied forces and motion and at A level you will explore this topic in more detail so it is essential you have a good understanding of the content covered at GCSE. You will be expected to describe, explain and carry calculations concerning the motion of objects. The websites below cover Newton's laws of motion and have links to these in action.

<http://www.physicsclassroom.com/Physics-Tutorial/Newton-s-Laws>

<http://www.sciencechannel.com/games-and-interactives/newtons-laws-of-motion-interactive/>

**Now** - Sketch a velocity-time graph showing the journey of a skydiver after leaving the plane to reaching the ground.

Mark on terminal velocity.

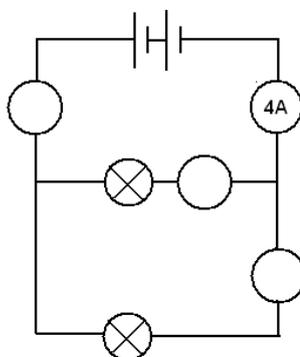

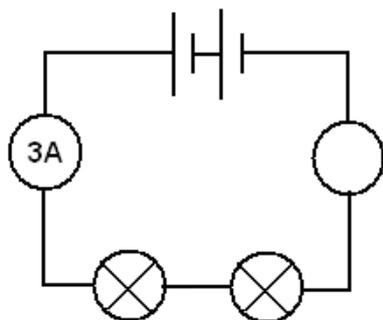

## Electricity

At A level you will learn more about how current and voltage behave in different circuits containing different components. You should be familiar with current and voltage rules in a series and parallel circuit as well as calculating the resistance of a device.

<http://www.allaboutcircuits.com/textbook/direct-current/chpt-1/electric-circuits/>

<http://www.physicsclassroom.com/class/circuits>

**Now 1a)** Add the missing ammeter readings on the circuits below. All lamps are the same.

**b)** Explain why the second circuit has more current flowing than the first.

**2)** Add the missing potential differences to the following circuits
